

CCM Update 4 2010
DRAFT

| Module/ Section | Page | Addition/Change/Deletion | Replace pages |
|--------------------|------|--|------------------|
| 17 | 29 | Corrected the second example and the sentence preceding it: The mono record for Urinary incontinence should have a 490 1/830 instead of a 730 because the issue is part of the regular numbering of the serial (it is an analytic even though it is called a special issue). The distinction is not if the issue is called "special;" the distinction is if the issue is part of the serial's numbering. LCRI 21.30G (where instruction about 730 field is found) applies only to unnumbered issues. | 29-30 |
| 31 | 41 | Corrected 776 link in the second example of the online record so that it cites the print version | 41-42 |
| App. C | 1-4 | Added footer | all |
